

HASEEB METLA

Senior Full Stack Engineer | AI Applications & Node.js Ecosystem | Node.js, React, REST/GraphQL APIs & Containerized Deployments

haseebmetla70@gmail.com | +92 312 6085136 | [LinkedIn](#) | [Git Hub](#) | [portfolio](#) | Full UK Time Zone Overlap Available (GMT/BST)

EXECUTIVE PROFILE

Autonomous, delivery-focused Full Stack Engineer with 11+ years of production experience engineering highly available, reliable, and secure APIs, microservices, and web portals. Expert in JavaScript/TypeScript stacks (Node.js, Express, React), containerized cloud architectures (Docker), and integrating internal proprietary platforms with cutting-edge LLM APIs and emerging agentic development frameworks.

KEY ENGINEERING WINS

API & Core Infrastructure Engineering

- Designed and engineered highly available Node.js backends and microservices platforms, reducing processing overhead and boosting end-to-end performance cycles by **25–35%**.

LLM API Integration & Acceleration

- Connected corporate internal platforms with modern LLM interfaces using secure custom API routing, accelerating development workflows and task automation cycles.

Containerization & Release Automation

- Wired robust automated QA matrices into active CI/CD systems, deploying multi-platform containers using Docker configurations to eliminate release downtime by **30%**.

Performance & Rendering Discipline

- Restructured data fetching architecture and caching workflows on enterprise-level dashboards, decreasing data load latency by **~20%**.

EXPERIENCE

Lead Frontend Developer (SaaS Architecture)

Luxoft *(Remote)*

Mar 2023 – Present

- Execute pure hands-on development, turning well-defined product blueprints into production-grade APIs, microservices, and internal web portals.
- Build robust backend microservices in Node.js and integrate them seamlessly with clean, highly functional TypeScript frontend surfaces.
- Collaborate closely with the Head of Engineering to independently pick up task tickets, manage system dependencies, and deliver clean code on strict schedules.

Senior Software Engineer (Frontend-Heavy)

Alnafitha IT *(Remote)*

Jun 2020 - Mar 2023

- Developed and maintained complex web client architectures, integrating front-end frameworks with secure REST and GraphQL API structures.
- Optimized backend data layers and payload shaping, ensuring secure authentication modules, empty/error UI states, and robust system validation.

Software Engineer

Software One *(Hybrid)*

Dec 2017 – Jun 2020

- Engineered web applications and robust services using Node.js/Express pipelines and database backends, achieving a documented **35%** speed gain on core processing processing screens.

- React frontends on Node.js/Express and MySQL; 35% performance gain on core screens.
- Shipped tested, polished releases with product, design, and QA.

CORE COMPETENCIES

- **Backend Engineering:** Node.js, Express, Microservices Architecture, REST APIs, GraphQL, Python (Basic Integration).
- **Frontend Ecosystem:** JavaScript (ES6+), TypeScript, React, Next.js, Redux Toolkit, Context API, HTML5, CSS3.
- **Cloud & DevOps:** Cloud Infrastructure (GCP/AWS familiarity), Docker (Containerized Deployments), CI/CD, Git, JIRA.
- **AI Integrations:** LLM API Implementations, Agentic Workflows Integration, Functional Prompt Architectures.

ARCHITECTED PROJECTS

Soum.sa — Online Auction & Marketplace Platform [Link](#)

- Engineered marketplace workflows, search components, and administrative dashboards; optimized rendering discipline to improve web usability under heavy live traffic.

Abhi — Fintech Web & Mobile Platform [Link](#)

- Built secure React/React Native interfaces with highly available Node.js APIs and PostgreSQL databases for salary-advance internal workflows, dashboards, and authentication rails.

SkillMatch — Job Matching Platform [Link](#)

- Developed performant React/Next.js internal web portals, automated search-matching pipelines, administrative dashboards, and internal REST API integrations.

EDUCATION

B.S. in Computer Science (BSCS) — Bahauddin Zakariya University 2011 – 2015 • CGPA 3.60 / 4.00
