

HASEEB METLA

Senior Full Stack Engineer • React • Next.js • Node.js • TypeScript

haseebmetla70@gmail.com | +92 312 6085136 | [LinkedIn](#) | [Git Hub](#) | [portfolio](#) | Available for Global Remote Contracts & Full-Stack Consultation

EXECUTIVE PROFILE

Analytical Senior Full Stack Engineer with 11+ years of production experience architecting, scaling, and deploying high-performance web and mobile client applications. Proven track record of turning complex business requirements into highly reusable design-system foundations, type-safe API microservices, and optimized cloud architectures that hold up under real massive traffic.

KEY ENGINEERING WINS

Next.js High-Traffic Optimization

- Overhauled server-side rendering (SSR) and data-fetching discipline on the highest-traffic routes of Soum.sa, dropping page load latency by ~20% on real devices.

Data-Heavy Dashboard Acceleration

- Mitigated UI stalling under peak workloads by implementing advanced client-side caching, smart pagination, and payload shaping across critical data flows; 25–35% faster end-to-end performance.

Design System & Component Standardization

- Extracted and maintained a shared corporate component library with strict review rules, reducing duplicate UI bugs by half and cutting feature development turnaround cycles by 50%.

Automated Quality Pipelines

- Wired comprehensive unit, integration, and E2E testing matrices (Jest, Playwright) directly into active CI/CD pipelines, driving software production incidents down by 25–30%.

EXPERIENCE

Senior Software Engineer (Technical Lead)

Luxoft (*Remote*)

Mar 2023 – Present

- Own frontend and backend microservices delivery for customer-facing web platforms utilizing Node.js, Next.js, TypeScript, and modern CSS layout engines.
- Lead and mentor a remote team of 6+ engineers while remaining fully hands-on with mission-critical system integration architectures.
- How I work: Establish secure, maintainable engineering standards that deliver rapid, stable software deployments.

Senior Full-Stack Developer

Alnafitha IT (*Remote*)

Jun 2020 - Mar 2023

- Independently architected scalable system interfaces, translating abstract product specifications into responsive, highly accessible customer-facing web surfaces.
- Integrated frontend applications with secure backend APIs, managing token authentication routines, multi-state cache layers, and validation blocks.

Full Stack Software Engineer

Software One (*Hybrid*)

Dec 2017 – Jun 2020

- Shipped production-grade full-stack features using Node.js backends and database schemas, achieving a documented 35% speed gain on core processing screens.

Software Engineer

GlobalLogic Innovations

Jul 2015 – Dec 2017

- React frontends on Node.js/Express and MySQL; 35% performance gain on core screens.
- Shipped tested, polished releases with product, design, and QA.

CORE COMPETENCIES

- **Frontend Core:** JavaScript (Expert), TypeScript, React, Next.js (SSR/SSG), Redux Toolkit, Context API, Zustand, HTML5, CSS3, Tailwind CSS, Material UI (MUI).
- **Backend & Cloud:** Node.js, Express.js, tRPC, REST APIs, GraphQL, Microservices Architecture, AWS cloud services, Docker containerization.
- **Testing & Delivery:** Jest, Vitest, Playwright, CI/CD Automation pipelines, Git version control, JIRA process tracking.
- **AI Productivity:** Direct steering of AI-powered agent workflows (Claude, ChatGPT, GitHub Copilot) to accelerate product engineering cycles.

ARCHITECTED PROJECTS

Soum.sa — Online Auction & Marketplace Platform [Link](#)

- Engineered responsive cross-browser marketplace components, advanced product search-matching algorithms, and analytical admin panels built for high-scale concurrency.

Abhi — Fintech Web & Mobile Platform [Link](#)

- Co-built secure cross-platform React/React Native structures with relational database storage setups for salary-advance modules, financial tracking, and real-time validation matrices.

SkillMatch — Job Matching Platform [Link](#)

- Developed performant React/Next.js internal web portals, automated search-matching pipelines, administrative dashboards, and internal REST API integrations.

EDUCATION

B.S. in Computer Science (BSCS) — Bahauddin Zakariya University 2011 – 2015 • CGPA 3.60 / 4.00
