

HASEEB METLA

Senior Full-Stack AI Engineer | React · TypeScript · Node.js · AI/LLM

haseebmetla70@gmail.com | [Whatsapp](#) | [LinkedIn](#) | [Git Hub](#) | Pakistan | Open to World wide | Remote

EXECUTIVE PROFILE

Senior Full-Stack Engineer with 11+ years of experience owning production web platforms across React, TypeScript, Node.js, PostgreSQL, AWS, and AI/LLM technologies. Experienced in taking features from scope → build → test → release, owning production issues, making architecture decisions, and using AI coding agents daily to accelerate development while maintaining engineering quality.

PROFSSIONAL EXPERIENCE

Sr.Lead Full Stack Software Engineer

Luxoft (*Remote*)

Mar 2023 – Present

- Own features end to end scope, architecture, build, test, review, and production release across React, Next.js, TypeScript, Node.js, PostgreSQL, REST APIs, and AWS.
- Use Claude Code, Cursor, Codex, and ChatGPT daily for planning, implementation, debugging, refactoring, code review, and verification while maintaining production engineering standards.
- Improve key application flows by **25–35%** through frontend optimization, caching, API improvements, database tuning, and architectural changes.
- Own production application support including monitoring, troubleshooting, incident resolution, performance issues, and permanent fixes.
- Document technical decisions, architecture approaches, implementation guidelines, and trade-offs while managing technical debt as systems evolve.
- Lead and mentor **6+** developers and collaborate asynchronously with product, engineering, and business stakeholders through clear written communication.

Lead Full Stack Software Engineer

Alnafitha IT (*Remote*)

Jun 2020 - Mar 2023

- Owned production features across React, Next.js, TypeScript, Node.js, PostgreSQL, MongoDB, Redis, AWS, and Docker, from requirements through deployment and support.
- Built AI-powered workflows using LLM APIs, RAG, prompt engineering, and AI agents, reducing repetitive manual work by **30–40%**.
- Improved data-heavy operations by **30–50%** through query optimization, indexing, caching, and pagination.
- Contributed to greenfield product architecture, technical decisions, testing, CI/CD, documentation, and production support.

Sr.Full Stack Software Engineer

Software One (*Hybrid*)

Dec 2017 – Jun 2020

- Built and supported production React/Next.js and Node.js applications with PostgreSQL/MongoDB, Redis, REST APIs, and AWS.
- Delivered features end to end while resolving performance, scalability, and production reliability issues.

Full Stack Software Engineer

GlobalLogic Innovations

Jul 2015 – Dec 2017

- **Built** and maintained React frontends and Node.js/Express + MySQL backends; improved performance **35%** and hardened reliability.
- **Worked** with product, design and QA to ship polished, well-tested releases.

ENGINEERING IMPACT

- **5+** AI/LLM-powered workflows using LLM APIs, RAG, prompt engineering, and AI agents.
- **20–30%** faster feature delivery through reusable architecture, automation, and AI-assisted development.
- **25–35%** improvement in key application flows through performance and architecture optimization.
- **25–30%** reduction in production bugs/incidents through testing, reviews, and stronger release practices.
- Led and mentored 6+ developers while remaining hands-on.

TECHNOLOGY & ENGINEERING EXPERTISE

- **Frontend:** React.js, Next.js, TypeScript, JavaScript, React Native, HTML5, CSS3
- **Backend:** Node.js, NestJS, Express.js, Fastify, REST APIs, GraphQL, Microservices
- **Data:** PostgreSQL, MongoDB, Redis, Data Workflows, Background Jobs
- **Cloud & DevOps:** AWS, Docker, Kubernetes, Lambda, ECS, EKS, RDS, S3, API Gateway, CI/CD
- **AI-Native Development:** Claude Code, Cursor, Codex, ChatGPT, OpenAI, Claude, RAG, LangChain, LangGraph, AI Agents, Prompt Engineering
- **Architecture:** System Design, Distributed Systems, Event-Driven Architecture, Scalable APIs
- **Quality & Operations:** Jest, Vitest, Playwright, Production Support, Monitoring, Incident Response, Performance Optimization
- **Engineering:** Git/SCM, Technical Documentation, Architecture Decisions, Technical Debt Management, Code Reviews, Remote Async Collaboration

SELECTED ENGINEERING PROJECTS

MobeHealth — Digital Health & Telemedicine Platform [Link](#)

Healthcare platform supporting records, appointments, telemedicine, and real-time communication.

- **Built** full-stack features and APIs supporting healthcare workflows and sensitive data handling.

Abhi — Fintech Web & Mobile Platform [Link](#)

Data-driven fintech platform supporting salary advance workflows and business operations.

- **Built** React/React Native interfaces and Node.js/PostgreSQL services for API-driven financial workflows.

Soum.sa — Online Auction & Marketplace Platform [Link](#)

Production marketplace supporting live auctions, transactions, and real-time workflows.

- **Built** React/Next.js frontend and Node.js backend services, improving key page performance by ~20%.

EDUCATION

B.S. in Computer Science (BSCS) — Bahauddin Zakariya University 2012 – 2015 • CGPA 3.60 / 4.00
